## Summary

With 20 years of software engineering experience I have designed, built, and managed software projects for government, tech giants, and gaming startups. I am currently employed as a Developer Relations Engineer at Google, where I foster community engagement and drive developer influences.

## Key Impacts

- As a Developer Relations Engineer at **Google**, I launched technically complex API improvements, modernized metrics, and set strategy for the Ads Unity plugin.
- As the first engineer and Team Lead at **Agrisync**, I helped launch our customer support and WebRTC solution which eventually led to a **buyout by John Deere**.
- As a Senior developer at **ScrabbleGo**, I wrote the MVVM data binding framework which managed the relationship between Tech Artist, Animators, and Developers. ScrabbleGo was **purchased by Scopley**.
- As a **managing partner** at Simple Systems I proposed, designed, developed, managed and sold a supply chain management solution for the **Department of Public Social Services County of Los Angeles**.
- As a plugin contractor for **Realtime.co**, I developed and maintained the Xamarin and Unity3d client SDKs. This required significant knowledge of Objective-C, Java, and low level interoperability.

## Work History

### Google — Developer Relations Engineer

*June 2021 - Present*

As a Developer Relations Engineer at **Google**, I launched technically complex API improvements, modernized metrics, and set strategy for the Ads Unity plugin.

### AbcMouse, The Learning Company — Senior Developer

*June 2020 - 2021*

At the learning company I worked on the front end and framework teams. On the front end team I worked on implementing the first live ops product in the company's history.

### ScrabbleGo, PierPlay / Scopely — Senior Developer

*October 2016 - 2019*

As a Senior developer at **ScrabbleGo**, I wrote the MVVM data binding framework which managed the relationship between Tech Artist, Animators, and Developers. ScrabbleGo was **purchased by Scopely**.

### BingoBlitz, Playtika — Senior Developer

*October 2015 - 2016*

As a Senior developer on Bingo Blitz, my responsibility was to transition the team and product from a Flash development stack and into a Unity3D one. This required a combination of education, process reforms, and code migrations.

### Agrisync, Iowa— Lead Developer

*October 2014 - 2020*

As the first engineer and Team Lead at **Agrisync**, I helped launch our customer support and WebRTC solution which eventually led to a **buyout by John Deere**.

## **Realtime.co, Portugal— Native SDK Contractor**

**2013 - 2014**

As a plugin contractor for **Realtime.co**, I developed and maintained the Xamarin and Unity3d client SDKs. This required significant knowledge of Objective-C, Java, and low level interoperability.

## **L.A. County DPSS, Simple Systems — Managing Partner**

**2004 - 2013**

Simple Systems is a contract shop focused on the development of web portals for government and medium sized industry. Our principal customer was the **County of Los Angeles Department of Public Social Services**.
